Everybody has a hero in the heart. My hero is Florence Nightingale. She was a famous British nurse. She was born in a rich family on 12th May, 1820. Would you like to live in school? We had a survey about it and here's the result. Most students prefer to live in school because they find it convenient to communicate with their classmates. Also, they can learn how to look after themselves in this way.

However, some students think living at home is a better choice. The main reason is that they can relax better at home. Besides, they can spend more time with their family members and get on better with them.

As for me, I'd like to live in school. There are three reasons. First, I can spend more time on study. Second, it's a wonderful experience to live with other classmates. Third, my parents are very busy, so they always leave me at home alone. I feel very lonely. I think living in school is the best choice for me.

I know your problem. You've made two mistakes. First, you used your classmate's pen without her permission. Second, when you broke the pen, you didn't tell her the truth. You must tell her immediately and apologise to her. If you tell her the truth, perhaps she'll still be angry with you, but at least you'll prove you are honest. Then I think you should offer to pay. You can use your pocket money to buy a new pen for her. She will realize that you're truly sorry.

I hope the advice can help you. I'm sure you will make up with her soon.

Yours,  
Jim

of the Internet**

The Internet has already come into our life. It brings us not only a lot of convenience and happiness, but also troubles. Some students use Internet as a tool to study. They look up some important information that they want. They also look through news or send and receive emails through it. The Internet helps them to learn more and better. On the other hand, some students play games, chat with friends, or see films the whole day. They lose interest in their schoolwork. Some students even use it

to copy homework or cheat in an exam. It is very dangerous for them. In my opinion, we should make better use of the Internet and try to use it to make our life better and more beautiful.

#### My Favourite Photo

I have many photos in my photograph album. And this one is my favourite. It was taken by my dad when I was only five years old. It shows a boy who is trying to learn to ride a bicycle and an old man holding the bike for the boy. The boy is a little nervous and the old man is trying to follow the bike all the time, with smiles and sweat on his face. It describes the love between the boy and the old man. Every time I look at it, it reminds me of my happy childhood and my grandfather's love for me.

Nowadays, more and more people are using their cameras or mobile phones to take photos.

It's a good way to record life. Here are some tips for you.

First, don't always put your subject in the centre of your picture.

Second, always take your camera with you. There will always be something beautiful around you. Be ready to take photos of them at any time.

Third, when others are taking photos of you, don't just stand in front of the camera. You can try jumping.

Last, pay more attention to the light. In my opinion, it is really important.

### How to Save

Our government is aiming to build an "economized society". I think it is every citizen's duty to work hard to achieve this goal. As students, we can still do something to help.

First, don't waste things. We'd better go to school on foot or ride a bike instead of taking a car. Turn off the lights as soon as we leave the classroom. Remember to turn off the tap at once after washing our hands.

Next, use things for as long as possible. When we buy things, make sure that they last a long time. Don't use a paper cup or a paper bag. It's better to use a china cup and a lunch box because we can use them again.

Finally, collect what can be recycled in our classroom or in our neighbourhood and sell them. We should also buy things made from recycled materials.

In a word, I think, one thing we should keep in mind is that no matter what a small effort we make, it does make a difference.

本题你将听到一段独白,读两遍。请根据独白内容,用所听到的单词或短语完成下列各题。(每空不超过三个单词。)

Today let's talk about some kinds of new energy in the twenty-first century. The first one is energy from the wind. Wind is a kind of clean energy, and there is lots of it. But if there's no wind, there is no wind energy.

The second one is energy from the water. When water moves from a high place to a lower place, it can make electricity without pollution. However, people have to build a huge building to use this energy. It is very expensive.

The third one is energy from the sun. It's also called solar energy. People use solar panels to turn energy from the sun into electricity. Solar power is clean and rich, but when the weather is bad, it doesn't work.
